IX. NORTEC ANNUAL ACTION PLAN

M. Cross led a discussion of the four goals, and proposed strategies for meeting those goals, in the draft annual action plan as presented in the agenda.

The first goal, “Increase connections with employers to understand current and emerging business needs and increase awareness of the services that are available to businesses” generated a lengthy discussion around partner roles, sector strategies, how some of these strategies might work in rural areas, and the involvement of our WIOA service providers in these activities. Cross reported the California Workforce Development Board had provided additional funding to help regional planning units cover staffing and other charges associated with these activities, along with layoff aversion funding. Cross also discussed activities around expanding regional labor market information to assure the data is current and appropriately detailed. He also discussed the new requirement under WIOA with respect to determining “customer satisfaction” and NoRTEC’s efforts with conducting both job seeker and employer surveys to gather information on the quality of services provided.

Cross also discussed goals 2, 3, and 4, and the proposed strategies to meet those goals, noting preliminary work was already underway.
